

Environmental Policy Statement

Willerby Landscapes Limited (Supplier and installer of Soft and Hard Landscapes for the Public and Private use) recognises that its day to day operations can impact directly and indirectly on the environment. We aim to protect and improve the environment through good management and by adopting best practices wherever possible.

In all our activities we aspire to:

- Conduct our activities with proper regard to the protection of the environment.
- Comply with all applicable government legislation, regulations, guidelines, and industry codes of practice.
- Prevention of pollution in all areas of the company's operations by avoiding spillages and ground water contamination by the use of good and improved working practices.
- Effectively communicate our environmental policy to employees, contractors and suppliers.
- Provide employees with appropriate training, information and awareness on environmental issues relevant to our activities.
- Minimise environmental disturbance in all activities.
- Minimise the waste to landfill by improved management of waste and whenever possible by re-using and re-cycling.
- Make efficient use of natural resources, minimising waste and conserving energy and water.
- Take steps to improve the environmental efficiency of our transport and travel arrangements.
- Regularly review our environmental performance by recording and monitoring to ensure the objectives are being achieved and to revise and set new targets to continue the company's environmental improvements.

We are continuing to work towards FORS and as part of the accreditation process we are required to work towards reducing our carbon footprint where possible.

Matt Ainscow
Managing Director
