

Sustainability Policy Statement

Willerby Landscapes Ltd is aware of the impact that landscaping activities has on the environment both positively and negatively; which is why Willerby Landscapes Ltd is committed to incorporating effective sustainability measures in all associated activities.

Willerby Landscapes Ltd have committed to the following verified Science Based Target:

- 42% reduction of Scope 1 and Scope 2 emissions by 2030 from a 2020 baseline
- Measure and reduce Scope 3 emissions

Willerby Landscapes Ltd understand that reducing carbon emissions is not the only measure of ensuring that a sustainable culture is achieved. Willerby Landscapes Ltd understand that the three pillars of Sustainability (Environmental; Social; Economic) must be incorporated into the business decisions and activities in order for a sustainable culture to be effective.

Willerby Landscapes, therefore, aspire to achieve the following in all activities:

- Ensure that the requirements of ISO14001:2015 are, at minimum, adhered to;
- Comply with all relevant legislation at all times;
- Protect the environment from all forms of pollution through effective control measures, appropriate planning and utilising best practice at all times;
- Reduction of waste through the incorporation of a circular economy, responsible procurement and appropriate planning;
- Ensure that the culture at Willerby Landscapes Ltd is open and honest at all times through regular audits and feedback;
- Ensure that regular and relevant training is available to employees at all times;
- Endeavour to reduce the negative impacts the business activities will have on the local communities through effective control measures, appropriate planning and effective communication;
- Endeavour to positively impact local communities by implementing measures such as, procuring material and equipment from local vendors and employment of local residents, where possible;
- Investment in innovative and appropriate technologies where relevant and possible, to ensure that sustainability targets are achieved and bettered;
- Procure from sustainable and environmentally conscious companies to ensure that the negative impact upstream and downstream is minimised and mitigated;
- Procure sustainably sourced materials and equipment to ensure that the embodied carbon and social impact, both local and international, is minimised and mitigated
- Regularly audit and evaluate performance to determine where betterment in sustainability can be achieved
